

LENA CHERCHENKO

QA ENGINEER · MANUAL & AUTOMATION · ISTQB
CERTIFIED

lenazurich@gmail.com
+41 76 588 66 45
Zurich, Switzerland

ABOUT ME

ISTQB-certified Software Tester with a Master's degree in Business Informatics. Bringing a strong background in credit and risk management, I successfully transitioned into IT and now focus on software testing and test automation. Experienced in microservices, API testing, enterprise integrations, and both manual and automation QA practices.

SKILLS

QA ENGINEER (MANUAL & AUTOMATION)

- Requirements & risk analysis
- Test design (EP, BVA, Decision Tables)
- Manual, exploratory & regression testing
- Test automation (UI & API)
- Test results analysis & reporting

AUTOMATION & TOOLS

Playwright (TypeScript),
Selenium, Axios, TestNG

TEST FRAMEWORK DESIGN

Project setup, scalable test structure, fixtures, reusable utilities

PROGRAMMING

Java, JavaScript, TypeScript

CI/CD & DEVOPS

GitHub Actions, TeamCity, Git (branching, code review)

NON-FUNCTIONAL TESTING

- Security testing (OWASP ZAP, PortSwigger/Burp Suite)
- Accessibility
- Performance

OBSERVABILITY

WORK EXPERIENCE

Automation QA Engineer

2023 – 2025

airSlate Inc. · USA / Ukraine · Remote

KEY ACHIEVEMENTS

- Implemented automated coverage for **50+ backend endpoints** of a new backend proxy layer built to connect the new frontend with legacy backend services, improving regression speed and release reliability.
- Developed **143 end-to-end automated tests** for bot-related workflows, including **54 API E2E tests** and **89 UI E2E tests**.
- Contributed to the implementation and maintenance of **12+ reusable integration clients** for services such as Salesforce, NetSuite, Google, Microsoft 365, OneDrive, SharePoint, HubSpot, Dropbox, Airtable, Monday, Smartsheet, and Clio.

AUTOMATION & QA ENGINEERING

- Developed and maintained UI and API automated tests using **Playwright** and **TypeScript**.
- Designed scalable automation project structure, reusable helpers, fixtures, and test data flows to keep the suite maintainable as coverage expanded.
- Built automated end-to-end scenarios covering internal services, external integrations, and cross-system workflows.
- Configured **GitHub Actions** workflows to run automated suites on schedule, via webhooks, or manually.
- Worked with Git-based parallel development workflows, code reviews, and branch coordination to keep automation changes aligned with ongoing product development.

BACKEND, INTEGRATIONS & OBSERVABILITY

- Collaborated with Core Backend and Integrations teams to validate microservices, API contracts, authentication flows, error handling, and distributed service behavior.
- Supported troubleshooting of complex integration workflows across enterprise APIs and third-party systems.
- Used **Loki** and **Grafana** to analyze logs, investigate failures, and identify backend error origins.

SECURITY AUTOMATION PROJECT

- Built an end-to-end Playwright automation project for **OWASP Juice Shop** covering UI flows, API checks, and realistic user scenarios.
- Set up project architecture, test organization, reusable components, and CI execution flow from scratch.
- Used **OWASP ZAP** and **PortSwigger/Burp Suite** to explore security testing scenarios and common web application vulnerabilities in a practice environment.

GITHUB PROJECT: [qa-juice-shop](#)

Manual QA Engineer

2020 – 2023

airSlate Inc. · USA / Ukraine · Remote

KEY ACHIEVEMENTS

- Implemented automated API coverage for a backend system containing **30+ API routes**, significantly improving release reliability and accelerating regression and release verification through earlier defect detection.

Elasticsearch / Kibana, Grafana / Loki

SOFT SKILLS

- Analytical thinking
- Problem-solving
- Teamwork
- Cross-team collaboration
- Parallel development workflow

LANGUAGES

English, B2
German, B2
Russian, Native
Ukrainian, Native

EDUCATION

MASTER IN BUSINESS INFORMATICS

National Economic University, Kyiv
(2002)

COURSES

ISTQB (CTFL)
Test automation Selenium / TestNG (Java)
Performance testing (JMeter)

- Developed reusable API clients and wrappers for test data setup, validation, and cleanup flows across product services and third-party integrations.
- Led release testing activities and prepared QA release notes to support stable product delivery across distributed teams.

MANUAL TESTING & QA PROCESSES

- Performed manual UI and API testing using browser developer tools and proxy utilities across multiple OS environments.
- Worked within a microservices architecture, analyzing service dependencies, integration risks, and cross-system behavior.
- Created and maintained test cases, test plans, checklists, and QA documentation in **TestRail** and **Allure**.
- Participated in Agile ceremonies including sprint planning, grooming, retrospectives, and release discussions.
- Performed Black Box and Grey Box testing, using Git code insights to improve test coverage and identify risk areas.

BACKEND, API & OBSERVABILITY

- Worked with Core backend services and validated microservice APIs, including response structures, authentication flows, and error handling.
- Used **Postman** and internal tools for functional, integration, and regression API testing.
- Investigated defects using **Kibana** and collaborated with backend teams to localize issues and identify root causes.
- Ensured backend stability through dependency testing and cross-service validation.
- Set up testing environments in **TeamCity** and maintained version control workflows using **Git**.

PAYMENT SYSTEMS & FINANCIAL INTEGRATIONS

- Tested paywalls and payment workflows, including integrations with **Stripe**.
- Validated subscriptions, billing cycles, refunds, failed transactions, and error-state behavior across payment flows.
- Developed a strong understanding of payment system compliance, transaction lifecycle testing, and financial data flow specifics.

Freelance Software Tester

2020 – 2021

test IO & uTest · Global, Remote

- Performed exploratory, smoke, system acceptance, regression, and end-to-end testing across web and mobile products.
- Executed predefined test scenarios and contributed to improving test coverage.
- Analyzed requirements to identify gaps and clarify expectations.
- Designed and executed test cases for functional and non-functional areas.
- Tested mobile and web applications using ADB, Postman, SOAP UI, and debugging tools.
- Gained experience testing gambling applications with regulatory and compliance requirements.
- Performed cross-browser and cross-platform testing.
- Conducted usability and UX-focused testing to improve product experience.

QA Intern

2020 – 2021

QA Light · Ukraine

- Designed and documented test cases based on requirements and user stories.
- Ensured full requirement coverage using a traceability matrix.
- Performed manual testing and defect management using Jira.

Additional Experience

Various banks & leasing companies · Ukraine · 2002 – 2010

- Risk Manager (2006–2010)
- System Administrator (2002–2003)
