

LENA CHERCHENKO

QA ENGINEER · MANUAL & AUTOMATION · ISTQB
CERTIFIED

lenazurich@gmail.com

+41 76 588 66 45

Zurich, Switzerland

ABOUT ME

ISTQB-certified Software Tester with a Master's degree in Business Informatics. Bringing a strong background in credit and risk management, I successfully transitioned into IT and now focus on software testing and test automation. Experienced in microservices, API testing, enterprise integrations and both manual and automation QA practices.

SKILLS

QA ENGINEER (MANUAL & AUTOMATION)

- Requirements & risk analysis
- Test design (EP, BVA, Decision Tables)
- Manual, exploratory & regression testing
- Test automation (UI & API)
- Test results analysis & reporting

AUTOMATION & TOOLS

Playwright (TypeScript),
Selenium, Axios, TestNG

TEST FRAMEWORK DESIGN

Project setup, scalable test structure, fixtures, reusable utilities

PROGRAMMING

Java, JavaScript, TypeScript

CI/CD & DEVOPS

GitHub Actions, TeamCity, Git (branching, code review)

NON-FUNCTIONAL TESTING

- Security testing (OWASP ZAP, PortSwigger/Burp Suite)
- Accessibility
- Performance

OBSERVABILITY

PET PROJECTS

lena-tmx/qa-juice-shop

WORK EXPERIENCE

Automation & QA Engineering

2023 – 2025

airSlate Inc. · USA / Ukraine · Remote · Product B2B SaaS platform for workflow automation, e-signatures, payments and enterprise integrations

KEY ACHIEVEMENTS

- Developed and maintained UI and API automated tests using **Playwright** and **TypeScript**, including automated coverage for **50+ backend endpoints**, development of **150+ end-to-end tests** across API and UI layers and maintenance of a **500+ automated test suite**.
- Built scalable automation infrastructure with reusable helpers, fixtures, test data flows, smoke validation scenarios and GitHub Actions CI workflows for scheduled and on-demand execution.
- Strengthened regression coverage for backend services and integration workflows, improving confidence in release readiness across distributed product teams.

AUTOMATION STRATEGY & COLLABORATION

- Designed automation coverage strategy and testing scope by balancing release risks, business priorities, regression value and long-term maintainability.
- Collaborated with Core Backend and Integrations teams to validate microservices, enterprise integrations and cross-system workflows across distributed services.

Manual QA Engineer

2020 – 2023

airSlate Inc. · USA / Ukraine · Remote

KEY ACHIEVEMENTS

- Implemented automated API coverage for a backend system containing **30+ API routes**, significantly improving release reliability and accelerating regression and release verification through earlier defect detection.
- Developed reusable API clients and wrappers for test data setup, validation and cleanup flows across product services and third-party integrations.
- Led release testing activities and prepared QA release notes to support stable product delivery across distributed teams.

MANUAL TESTING & QA PROCESSES

- Performed manual UI and API testing using browser developer tools and proxy utilities across multiple OS environments.
- Worked within a microservices architecture, analyzing service dependencies, integration risks and cross-system behavior.
- Created and maintained test cases, test plans, checklists and QA documentation in **TestRail** and **Allure**.
- Participated in Agile ceremonies including sprint planning, grooming, retrospectives and release discussions.
- Performed Black Box and Grey Box testing, using Git code insights to improve test coverage and identify risk areas.

Elasticsearch / Kibana, Grafana / Loki

SOFT SKILLS

- Analytical thinking
- Problem-solving
- Teamwork
- Cross-team collaboration
- Parallel development workflow

LANGUAGES

English, B2
German, B2

Ukrainian, Native

EDUCATION

MASTER IN BUSINESS INFORMATICS

National Economic University, Kyiv (2002)

COURSES

ISTQB (CTFL)
Test automation Selenium / TestNG (Java)
Performance testing (JMeter)

BACKEND, API & OBSERVABILITY

- Worked with Core backend services and validated microservice APIs, including response structures, authentication flows and error handling.
- Used **Postman** and internal tools for functional, integration and regression API testing.
- Investigated defects using **Kibana** and collaborated with backend teams to localize issues and identify root causes.
- Ensured backend stability through dependency testing and cross-service validation.
- Set up testing environments in **TeamCity** and maintained version control workflows using **Git**.

PAYMENT SYSTEMS & FINANCIAL INTEGRATIONS

- Tested paywalls and payment workflows, including integrations with **Stripe**.
- Validated subscriptions, billing cycles, refunds, failed transactions and error-state behavior across payment flows.
- Developed a strong understanding of payment system compliance, transaction lifecycle testing and financial data flow specifics.

Freelance Software Tester

2020 – 2021

test IO & uTest · Global, Remote

- Performed exploratory, smoke, system acceptance, regression and end-to-end testing across web and mobile products.
- Executed predefined test scenarios and contributed to improving test coverage.
- Analyzed requirements to identify gaps and clarify expectations.
- Designed and executed test cases for functional and non-functional areas.
- Tested mobile and web applications using ADB, Postman, SOAP UI and debugging tools.
- Gained experience testing gambling applications with regulatory and compliance requirements.
- Performed cross-browser and cross-platform testing.
- Conducted usability and UX-focused testing to improve product experience.

QA Intern

2020 – 2021

QA Light · Ukraine

- Designed and documented test cases based on requirements and user stories.
- Ensured full requirement coverage using a traceability matrix.
- Performed manual testing and defect management using Jira.

Additional Experience

Various banks & leasing companies · Ukraine · 2002 – 2010

- Risk Manager (2006–2010)
- System Administrator (2002–2003)
